

An innovative combination

Improve the ease of acquisition of triple combo data and open up logging for horizontal wells.

Coming soon: A new 3D horizontal product by NuTech.

ThruBit®: Horizontal Production Optimization

Benefits:

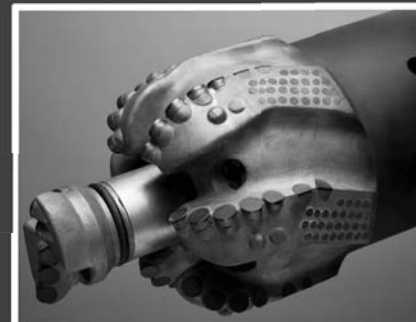

- Log highly deviated and horizontal wellbores
 - Optimize packer placement for frac optimization
 - Retrievable tools and sources
 - Drill pipe protection of wireline from borehole
 - Full circulation while logging
 - Rotation possible at RPM
-

NuTech: Advanced Petrophysical Analysis

Benefits:

- Identify potential pay intervals or bypassed pay
 - Accurate interpretations backed by strict comprehensive process
 - Evaluate wells even with limited data from client
 - More than 40,000 wells evaluated
 - Petrophysical, engineering and geological capabilities
-

A collaboration between NuTech and ThruBit® provides clients with a valuable, synergetic product that meets the expanded needs of customers in difficult environments.
